This EP is a collection of brand new and way old tunes, pulled together to get them out into the world, before my hard drive dies. Oldest tune is Get It Together, originally recorded in 2002 for the first Dub Asylum album. Newest tune (cut earlier this year) is Jumping Jack Skank, a stomping melodica groove. Jump and twist came out in May 2009 for NZ Music Month, and has been remastered here. Thanks to everyone who helped out, I appreciate your support! Take it easy.
